

Cohort-Specific Measures of Lifetime Social Security Taxes and Benefits: Ores Working Paper Series Number 110

By Dean R. Leimer

BiblioGov. Paperback. Book Condition: New. This item is printed on demand. Paperback. 106 pages. Dimensions: 9.7in. x 7.4in. x 0.2in. This paper develops estimates of lifetime money's worth and redistributive outcomes under the Old Age and Survivors Insurance (OASI) program for all past, present, and future birth cohorts affected by the program through the cohort born in 2100. The estimates presented in this study incorporate a comprehensive accounting of all OASI taxes and benefits and blend historical administrative data with tax and benefit projections. Projected taxes and benefits are consistent with the detailed intermediate economic and demographic assumptions underlying the 2002 Trustees Report and extended beyond the Trustees Report projection period using an approach consistent with the Trustees Report assumptions. The qualitative conclusions reached in this analysis should be unaffected by the relatively minor changes in key economic and demographic assumptions that characterize subsequent Trustees Reports. This item ships from La Vergne, TN. Paperback.
