## Transactions of the Institution of Engineers and Shipbuilders in Scotland Volume 28

By Institution Of Engineers Scotland

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1885 Excerpt: .explicit value of  $f$ , which mechanicians distinguish as Morin's constant, as,  $21,010 E \frac{1}{t_0}$  the  $N \log-i (a--n) V$  The perfect agreement of these formulae with the facts of experience has been illustrated so often that it is almost a waste of time to adduce further examples. I will note, for a few vessels, the values of  $a$  and  $b$  which enter equation (4), which is the approximate true form of the Admiralty equation, the ordinary well known forms being founded on a false law of the resistance, are entirely misleading and erroneous. According to this, the relation between the power and speed, say, for example, in the small vessel Warsaw, is,  $E = 2.97 V \log-i 111 V$ ; hence, for the following speeds, Trial Speeds Product by-111  $\log V \log 2-97 \log E$ .  $E$  By Trial, =  $1-6727 \ 2-1871 \ 2-5097 \ 2-7201...$
