### ***Reviews***

*A whole new eBook with a brand new point of view. It is definitely simplistic but shocks in the 50 percent of the publication. I am just pleased to explain how this is the greatest ebook i have read during my very own daily life and could be he best ebook for possibly.*

Not illustrated. 1915 Excerpt: .case lies in the fact that there was not a single vaginal examination made from the beginning to the end of the labor, all investigations being per rectum; in the fatal outcome of a Cesarean done quickly and easily on a patient apparently in fairly good condition except for a single factor, and in the necessity of a Cesarean at all in a pelvis of only a moderate contraction. The single and apparently very important factor above referred to is the long interval between the rupture of the membranes and the opening of the abdomen. It is a well known fact that the danger of abdominal section increases rapidly with even-hour of delay after rupture. It is an equally well known fact that to do an abdominal Cesarean on every patient with an external conjugate of 17 centimeters would be absurd, since a large majority will deliver themselves spontaneously, especially with the help of the Walcher position which increases the true conjugate diameter. That the patient was already infected before operation seems reasonably sure from the fact that she was already in bad condition when she returned to bed after operation, and that she died from peritonitis is shown by the fact that while no autopsy was obtained, the incision was opened post mortem and streptococci were demonstrated in the purulent exudate which bathed the abdominal cavity. As presenting a problem of great frequency and as the first death from abdominal Cesarean section by Dr. Peterson...
