Another who has a microscope of a power of 1000 can see other microbes. Another still with a power yet higher might claim to see more and other microbes. Where then is the limit to our observation and who can assign it? That there are creatures beyond the range or power of any of our optical contrivances to detect, is, I might say, certain; just as certain as that there are stars in the heavens beyond the range of our most powerful telescopes. Shall we then leave these creatures un-named, or shall we not classify...
